Construction Seating

KAB Seating is a specialist manufacturer of vehicle seats suitable for the Construction, Mining and Material Handling sectors and related applications. We are pleased to showcase our latest products which add to our extensive range and offer a complete seating solution for the vehicle user.

Our seats are rigorously tested to ensure compliance with international legislative standards. Our series of accessories including 2, 3 and 4 point seatbelt systems are packaged as a Modular Product Range which can be adapted for specific OEM requirements, giving the OEM and end user a wide range of choice. We continue to supply a choice of independent and integrated height adjustable seats, as well as seats which are specially adapted to allow fitment of joy stick controls.

KAB Seating work with a large range of OEMs to customise products for their specific environment and application. We benefit from a European wide network of distributors, who offer local advice to help find seats suitable for users' requirements, as well as helping with installation and seat servicing.

The Sentinel range is now available in Mid Back and Low Back options and is the perfect fit for Small/Compact construction and Material Handling applications complying with EM6/7/8 & 9 and IT1&2.
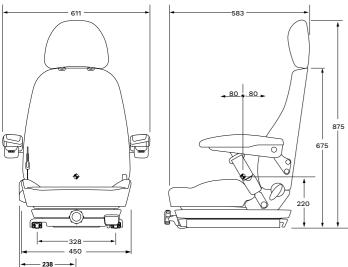

Contact your nearest KAB representative for more details on any of our products.

Construction Seating

- Sculpted comfort
- Affordable
- Tough
- Easy to install
- Modular

FEATURES
- Mechanical 11 suspension
- T1 Mid Back Upper
- Optional recoil lap belt to 15kN
- 150mm Suspension stroke
- 70mm integrated height adjustment
- 50-120kg weight range
- Optional 0-180° turntable for backhoes

11/K1

FEATURES
- Mechanical 11 suspension
- K1 Mid Back Upper
- Optional recoil lap belt to 15kN
- 150mm Suspension stroke
- 70mm integrated height adjustment
- 50-120kg weight range

525P

FEATURES
- Mechanical 52 Suspension
- T5 Mid Back Upper
- Optional recoil lap belt to 15kN
- 100mm Suspension stroke
- Vertical 60mm independent height adjustment
- 50-120kg weight range
- Pods to take vehicle joystick controls

554

FEATURES
- Air 55 Suspension
- T4 High Back Upper
- Optional recoil lap belt to 15kN or 22.2kN with tethers
- 125mm Suspension stroke
- 60mm independent height adjustment
- 50-120kg weight range
- 12v or 24v compressor or manual valve

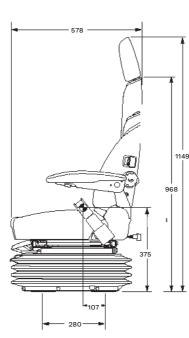

65/K4

FEATURES
- Air 65 low frequency suspension
- T4 High Back Upper
- Recoil lap belt to 15kN or 22.2kN
- 160mm Suspension stroke
- 60mm integral height adjustment
- 50-200kg weight range
- 12v or 24v integral compressor or manual valve

61/K1

FEATURES
- Mechanical 61 low frequency suspension
- K1 Mid Back Upper
- Recoil lap belt to 15kN or 22.2kN
- 160mm Suspension stroke
- 60mm integral height adjustment
- 50-175kg weight range
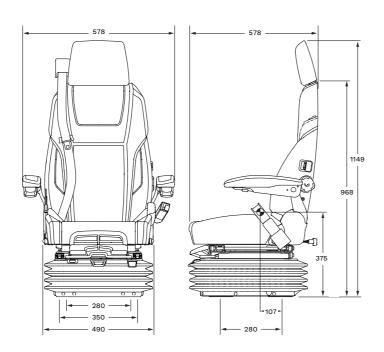

65/K4C

FEATURES
- Air 65 low frequency suspension
- K4 High Back upper
- C-4 Point Harness belt (SAE J2292)
- 160mm Suspension stroke
- Vertical 60mm integral height adjustment
- 50-200kg weight range
- 12v or 24v integral compressor or manual valve

65/K4B

FEATURES
- Air 65 low frequency suspension
- K4 High Back upper
- B-3 Point belt (SAE J2292)
- 160mm Suspension stroke
- Vertical 60mm integral height adjustment
- 50-200kg weight range
- 24v integral compressor or manual valve

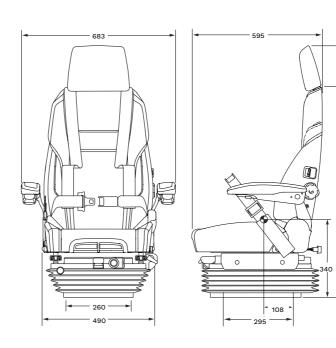

86/K4C

FEATURES
- Air 86 suspension
- K4 High Back upper
- C-4 Point Harness belt (SAE J2292)
- 175mm Suspension stroke
- Vertical 75mm integral height adjustment
- 50-150kg weight range
- 24v integral compressor or manual valve

Health and Safety
It is important that drivers of work vehicles are fully protected from harmful vibrations. KAB seats can eliminate up to 70% of these. Careful seat selection is important and through consultation with KAB Seating's network of Authorised distributors the appropriate seat choice can be made to fit most popular brands.

Installation
Care should be taken to ensure a correct installation is made and the seat suspension movements and adjustments are free from obstructions in the cab area.

Maintenance
KAB Seating provides a full range of service parts to ensure seats can be maintained properly, key wear items such as shock absorbers, seat cushions and air valves should be replaced on a regular basis in accordance with the type of usage, amount of usage and environmental factors.

Regular removal of dust and dirt from the seat and cabin will improve the longevity of the seat.
